

Module title: Imaging for Radiotherapy and Oncology
Module code 7HEP1042

This is a 15-credit, level 7, distance learning module that can be studied on its own or as a module on the following educational pathways:

- MSc / Pg. Dip / Pg Cert Advanced RT and Oncology Practice
- MSc Advanced Practice
- Pg Cert in Imaging for Radiotherapy

This module runs from in Semester A 2022 commencing **October 3rd 2022**.

Course aims

The aim of the course is to help you critically evaluate the role that contemporary imaging plays in the diagnosis, staging and management of cancer with specific reference to radiotherapy.

Content

The module is designed to enable you to advance your knowledge and understanding of a range of imaging modalities and their use in the management of cancer. You will study a range of equipment and imaging techniques and reflect on their use with respect to your own clinical practice. Topics typically include: imaging modalities used in cancer staging and diagnosis. Radiotherapy imaging practices in localisation, verification and treatment.

Assessment

100% coursework, submitted on-line. Typically a 3000-word reflective case study

Who teaches this course?

This distance-learning course is facilitated by Ruth Rowse who guides you through your learner journey, using on-line activities and tasks to support your learning.

What our students say

"The learning resources have been helpful, information has been easy to access and staff supportive"

Cost

The fee for new self-funding students is £810.00. Please note that the fee may vary depending on your source of funding and whether you are a returning student. To find out information about the fees visit go.herts.ac.uk/cpdfees.
